SUMMARY

Infrastructure Automation Engineer at Murex with an MSc in Cybersecurity and a BEng in Computer & Communication Engineering. Builds CI/CD and Kubernetes deployment workflows with Jenkins, Ansible, Terraform, Git, and Azure, backed by experience in enterprise networking, security monitoring, and low-level network research.

CORE SKILLS

Automation & CI/CD Ansible, Jenkins, Git, Kubernetes, Helm, Terraform, Docker, CI/CD pipelines
Cloud & Infrastructure Microsoft Azure, Linux, Prometheus, Grafana, Cloudflare Zero Trust, systemd, REST APIs
Programming & Scripting Python, C, Bash, SQL
Networking & Security Cisco IOS, FortiGate/FortiSwitch, MikroTik, SNMP, Wireshark, Nmap, Burp Suite, Nexpose
Languages English (Fluent), French (Fluent), Arabic (Native)
Credentials Bitdefender MSP Technical Specialist & Technical Solutions Professional (Jul 2024); Fortinet Security-Driven Networking training; IELTS C1 (Nov 2022)

EXPERIENCE

Murex

Mar 2026 – Present · Beirut, Lebanon

Infrastructure Automation Engineer

- Automate infrastructure delivery and CI/CD pipelines with Ansible, Jenkins, and Git.
- Build Kubernetes deployment workflows and upgrade Jenkins tooling with Helm charts and Docker.
- Provision Microsoft Azure infrastructure with Terraform and remote state.

Polytechnique & Télécom SudParis

Sep 2024 – Oct 2025 · Évry & Palaiseau, France

Network Security Researcher

- Built a C testbed to measure bottlenecks and capture UDP RTT traces across seven queue disciplines.
- Developed a two-stage Python classifier using Dynamic Time Warping (DTW) to identify CoDel, FQ-CoDel, Cake, PIE, RED, FIFO, and FQ.
- Achieved 87% classification accuracy on a live network without privileged router access.

Exeo

Apr 2024 – Jul 2024 · Paris, France

SOC R&D Intern

- Integrated Bitdefender, Prometheus, and Cisco/FortiGate SNMP data into Grafana using Python, SQL, and APIs.
- Automated alert management and Autotask ticket creation through Python webhooks.

Dar

Mar 2023 – Aug 2023 · Beirut, Lebanon

Cybersecurity and Network Engineer

- Deployed hardened configurations across 100+ Cisco access-layer switches.
- Automated FortiGate firewall and proxy operations; remediated Nexpose vulnerabilities and planned a secure VPN cipher-suite migration.

POTECH

Jun 2022 – Dec 2022 · Beirut, Lebanon

Cyber Threat Intelligence Officer Intern

- Automated reconnaissance and takedown workflows with Python, web scraping, APIs, and web bots.

SELECTED PROJECTS

- Synology NAS & App Platform** — Built a 36 TB raw DS925+ in SHR-1 with snapshots, Docker services, Prometheus/Grafana, and Cloudflare Zero Trust.
- Home Server & Automation** — Deployed an Ubuntu VM running systemd-managed Python services, automated YouTube publishing, media ingestion, and infrastructure monitoring.
- Django E-commerce Platform** — Built and self-hosts farmavetservices.com with Docker and Cloudflare Zero Trust.

EDUCATION

Institut Polytechnique de Paris

Sep 2023 – Dec 2025 · France

MSc, Computer Science — Cybersecurity · Highest Distinction in M2

American University of Beirut

Oct 2018 – Dec 2022 · Beirut, Lebanon

BEng, Computer & Communication Engineering · Dean's Honor List
